

## LOOSE LAY

SIMPLE INSTALL WITH BEAUTIFUL RESULTS  
ULTRA-LUXURY LOOK & FEEL, EASY MAINTENANCE

Loose lay flooring is installed without adhesive. This 'floating' option is quick to install and produces beautiful results. Loose lay flooring is installed by first gluing planks around the perimeter of the space then loosely laying the rest of the planks or tiles. When complete the planks or tiles will stay in place. Should the need ever arise to replace a plank, this product is the easiest and fastest to perform a repair.

MAXX Floors™ LooseLay features two layers of fiberglass for strong dimensional stability and Ultra-Shield™ Ceramic Bead top coat for high scratch resistance.
