

# WPC CLICK+

FAST INSTALLATION, ULTRA-LUXURY FEEL  
& INCREDIBLE NOISE CONTROL

MAXX Floors™ WPC Click+, with an integrated 2mm EVA Pad, gives you the look, feel and sound of a wood floor with the light-weight durability of composite plastic. And, because it's rigid core hides subfloor imperfections, WPC products can go over most subfloors without additional preparation.

WPC Click+ flooring features I4F, a patented technology that substantially improves and simplifies the installation and makes our product virtually waterproof. This means up to 30% faster installation time than basis angle/angle systems. No special tools needed.
